

Monthly Sales Trend Analysis

Task 17, Day 17

Prepared by: Akshat Srivastava

Objective

To summarize the Superstore sales data by month and visualize the resulting trend, in order to practice date grouping and line chart creation.

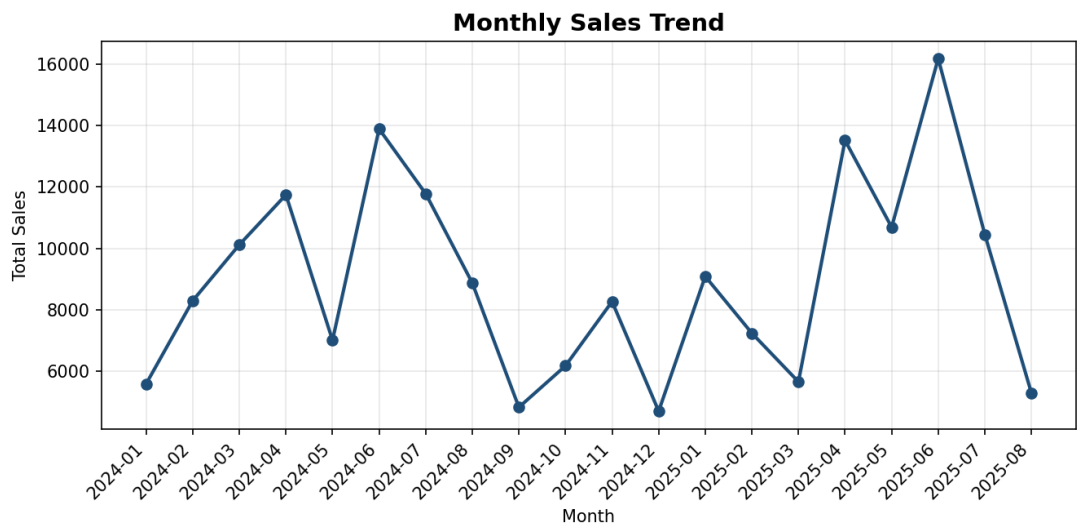

Methodology

- The Order Date field was converted into a Year-Month format (e.g. 2024-01) to enable monthly grouping.
- Sales values were aggregated for each month using a SUM/SUMIF operation.
- The resulting monthly totals were sorted chronologically (Jan 2024 through Aug 2025).
- A line chart was plotted with Month on the X-axis and Total Sales on the Y-axis to visualize the trend.

Monthly Sales Table

Month	Total Sales
2024-01	Rs 5,595.94
2024-02	Rs 8,301.17
2024-03	Rs 10,119.24
2024-04	Rs 11,743.45
2024-05	Rs 7,012.39
2024-06	Rs 13,886.07
2024-07	Rs 11,779.33
2024-08	Rs 8,875.26
2024-09	Rs 4,832.77
2024-10	Rs 6,181.47
2024-11	Rs 8,271.93
2024-12	Rs 4,707.18
2025-01	Rs 9,089.94
2025-02	Rs 7,243.12
2025-03	Rs 5,661.65
2025-04	Rs 13,515.49
2025-05	Rs 10,689.94
2025-06	Rs 16,174.82
2025-07	Rs 10,455.66
2025-08	Rs 5,299.20

Monthly Sales Trend Chart

Key Insights

- Total sales across the 20-month period stood at Rs 1,79,436.02, averaging Rs 8,971.80 per month.
- The highest monthly sales were recorded in 2025-06 at Rs 16,174.82.
- The lowest monthly sales were recorded in 2024-12 at Rs 4,707.18.
- Sales show noticeable month-to-month fluctuation rather than a single steady upward or downward trend, suggesting seasonal or order-volume driven variation.
- The first half of 2025 (April–June) shows a strong upward spike compared to the same period in 2024.

Conclusion

The monthly aggregation and line chart make it easy to spot peak and low sales periods across the two-year span. This kind of trend view can help the business plan inventory, staffing, and promotions around historically strong or weak months.
